\$180,000.00

Boyer, Inc.

Landscape Development

May 2006

Midtown Redevelopment Authority focuses on enhancing the image of the District with landscape beautification projects. Boyer, Inc. installed irrigation, landscape, pedestrian ramps and sidewalks along Elgin from Highway 59 N to Jackson. This project included large excavation of concrete from esplanades prior to planting. A fully automatic irrigation system was installed to help preserve the beautiful trees. Tile street names were installed at each street crossing to replicate historical Houston markings. Midtown landscapes projects have become some of the most prized in the city.
